REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a method and apparatus of transmitting signaling information in a telecommunications network between peer user application parts. Each independent claim identifies the uniquely distinct features: regarding claim 1, providing an adaptation layer between the MTP level 3 and the IP part at the originating signaling point, as well as at intermediate and destination signaling points, the adaptation layer providing an interface between the MTP level 3 and TCP/UDP levels and listening to a predetermined port number to receive and process incoming TCP connections or UDP packets; regarding claim 10 (originally filed claim 11), an adaptation layer between the MTP level 3 and the IP part at the originating, intermediate and destination signaling points, the adaptation layer providing an interface between the MTP level 3 and Transmission Control Protocol/User Datagram Protocol (TCP/UDP) levels and listening to a predetermined port number to receive and process incoming TCP connections or UDP packets. The closest prior art, Gessel et al. (US 5,732,213), Elliott et al. (US 6,614,781), Wheeler, Jr, et al. (US 6,831,914) disclose conventional communication systems, either singularly or in combination, fail to anticipate or render the above features obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
